

## Diccionario de datos

**Tabla:** aircrafts\_data

| Name          | Type         | Description                   | Example   |
|---------------|--------------|-------------------------------|---|
| aircraft_code | character(3) | Code for the aircraft         | 773   |
| model         | jsonb        | Aircraft model in JSON format | {"en": "Boeing 777-300", "ru": "Б о и н г 777-300"} |
| range         | integer      | The range of the aircraft     | 11100   |

**Tabla:** airports\_data

| Name         | Type         | Description                           | Example  |
|--------------|--------------|---------------------------------------|--|
| airport_code | character(3) | Code for the aircraft                 | YKS  |
| airport_name | jsonb        | Name of the airport in JSON format    | {"en": "Yakutsk Airport", "ru": "Я к у т с к"} |
| city         | jsonb        | City where the airport is located     | {"en": "Yakutsk", "ru": "Я к у т с к"}         |
| coordinates  | point        | Geographic coordinates of the airport | (129.77099609375,62.0932998657226562)          |
| timezone     | text         | Timezone of the airport               | Asia/Yakutsk                                   |

**Tabla:** boarding\_passes

| Name        | Type                 | Description      | Example       |
|-------------|----------------------|------------------|---------------|
| ticket_no   | character(13)        | Ticket number    | 0005435212351 |
| flight_id   | integer              | ID of the flight | 30625         |
| boarding_no | integer              | Boarding number  | 1             |
| seat_no     | character varying(4) | Seat number      | 2D            |

**Tabla:** bookings

| Name         | Type                     | Description                               | Example                |
|--------------|--------------------------|---|------------------------|
| book_ref     | character(6)             | Booking reference                         | 00000F                 |
| book_date    | timestamp with time zone | Booking date with timestamp and time zone | 2017-07-05 03:12:00+03 |
| total_amount | numeric(10,2)            | Total booking amount                      | 265700                 |

**Tabla:** flights

| Name                | Type                     | Description   | Example                |
|---------------------|--------------------------|---|------------------------|
| flight_id           | integer                  | Flight ID   | 1185                   |
| flight_no           | character(6)             | Flight number   | PG0134                 |
| scheduled_departure | timestamp with time zone | Scheduled departure time with timestamp and time zone | 2017-09-10 09:50:00+03 |
| scheduled_arrival   | timestamp with time zone | Scheduled arrival time with timestamp and time zone   | 2017-09-10 14:55:00+03 |
| departure_airport   | character(3)             | Departure airport code                                | DME                    |
| arrival_airport     | character(3)             | Arrival airport code                                  | BTK                    |
| status              | character varying(20)    | Flight status   | Scheduled              |
| aircraft_code       | character(3)             | Aircraft code   | 319                    |
| actual_departure    | timestamp with time zone | Actual departure time with timestamp and time zone    | \N                     |
| actual_arrival      | timestamp with time zone | Actual arrival time with timestamp and time zone      | \N                     |

**Tabla:** seats

| Name            | Type                  | Description     | Example  |
|-----------------|-----------------------|-----------------|----------|
| aircraft_code   | character(3)          | Aircraft code   | 319      |
| seat_no         | character varying(4)  | Seat number     | 2A       |
| fare_conditions | character varying(10) | Fare conditions | Business |

**Tabla:** ticket\_flights

| Name            | Type                  | Description      | Example       |
|-----------------|-----------------------|------------------|---------------|
| ticket_no       | character(13)         | Ticket number    | 0005432159776 |
| flight_id       | integer               | ID of the flight | 30625         |
| fare_conditions | character varying(10) | Fare conditions  | Business      |
| amount          | numeric(10,2)         | Ticket amount    | 42100         |

**Tabla:** tickets

| Name         | Type                  | Description       | Example       |
|--------------|-----------------------|-------------------|---------------|
| ticket_no    | character(13)         | Ticket number     | 0005432000987 |
| book_ref     | character(6)          | Booking reference | 06B046        |
| passenger_id | character varying(20) | Passenger ID      | 8149 604011   |
